Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24 and 40-44 and 50-55 and 56-59 and 60-104, drawn to memory testing, classified in class 714, subclass 718.
 - II. Claims 25-27 and 34-39, drawn to programming a programmable element, classified in class 365, subclass 185.14.
 - III. Claims 28-31 and 45-49, drawn to timing signal of memory or memory access and control, classified in class 711, subclass 167.
 - IV. Claims 32-33, drawn to affecting an output of a synchronous circuit, classified in class 365, subclass 189.04.
 - V. Claims 105-108, drawn to inter-exchange signaling, classified in class 379, subclass 229.

Because these inventions are distinct and have acquired a separate status in the art because of their recognized divergent subject matter as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct and the search required for Group I is not required for Group II (or Group III or Group IV or Group V) and vice versa, restriction for examination purpose as indicated is proper.

Art Unit: 2133

A telephone call was made to Mr. Charles Brantley on March 19, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traverse (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
